

Aluminium Awnings

Aluminium Awnings are designed to give external protection and are used to reduce the impact of weather. They are hard wearing and durable, offer a high resistance to corrosion and weathering and require minimal maintenance. They come in Fixed Canopy, and Fixed or Adjustable Louvre styles.

Horizontal Stripe
(Bahama)

Patio
(Kingston)

Vertical Stripe
(Caribbean)

Louvres
(Trinidad)

Aluminium awnings are hard wearing external window coverings. They are used to control light, radiant heat, and weather.

Special features of our Aluminium Awnings include:

- Very low maintenance and long lasting
- Fixed and adjustable louvre styles, and fixed canopy styles
- Adjustable louvres with either internal or external controls
- Provides substantial heat control in a durable form
- Co-ordinate, blend or contrast the exterior building with an extensive range of colours
- Assists in building protection
- Aluminium componentry is coated to protect the awning against environmental effects
- Extremely effective for providing privacy, light control and air flow for balconies and external windows
