

# Panel Glides

Panel Glides are an Asian inspired blind that is most suited to full drop windows and sliding doors. They feature large vertical panels of fabric that slide across the window or door. Often, Panel Glide Blinds are used on sliding doors in rooms where roman blinds feature on the windows.

Special features of our Panel Glide Blinds include:

- Wand Control
- Can stack to the left, right, each side or to the centre
- Choice of aluminium, timber battens or no battens
- Can match to our Roman Blinds
- Panel size and number can be tailored to suit
- Some cupping of the fabric may occur if battens are not used. This is a characteristic, not a fault
- Range of sunscreen and privacy fabrics
